

The Next Generation of DICOM Image Routing is Here!!

UltraGATEWAY 4.0 is a highly configurable DICOM routing and work flow application which distributes images and information within a facility, as well as any remote location for diagnostic, consultation or storage purposes.

Flexible configuration options combined with key features fulfill every organization's need for organized, efficient, and effective work-flow.

Compatible with the number of diverse imaging devices located throughout today's healthcare environment it becomes necessary to connect & centralize the devices for maximum productivity

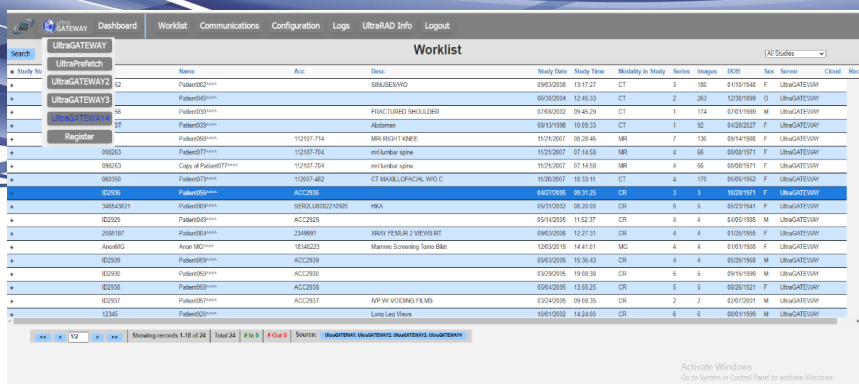

An Easy to Manage Web UI helps ensure patient information arrives at the intended destination in a timely manner
