ULTRAGATEWAY

Advanced DICOM Router for Efficient Workflow & Remote Collaboration

Introducing Cutting-Edge DICOM Image Routing

Experience the power of UltraGATEWAY 4.0—an advanced DICOM router designed to effortlessly handle medical data and images across healthcare facilities. This system optimizes diagnostics and consultations, ensuring a seamless flow of vital information. Harnessing cutting-edge DICOM WEB Services like WADO and QIDO, it empowers you to create tailor-made workflows. Moreover, it acts as a sturdy foundation for External Data Management (EDM), securing your data's integrity. Seamless integration capabilities make UltraGATEWAY 4.0 a vital ally in streamlining your healthcare workflow. Let's explore how UltraGATEWAY 4.0 can elevate your facility's efficiency without the hassle—get in touch today.
